Description

Summary

Move the nightly export job from the legacy cron host to the managed scheduler. **No data model changes.**

Plan

1. Deploy the job definition (disabled)
2. Run one manual execution and compare checksums
    - Row count
    - File hash
3. Enable the schedule and disable the cron entry

Export runs twice	Low	Disable the new schedule
Missed run	Low	
Checksum differs (see attached comparison)		Keep cron entry

> **Warning:** Maintenance window: Wednesday 06:00–07:00 (sample time zone).

Contact @Riley Placeholder for scheduler access. Formula check: H_2O and 10^3 rows. See the runbook.
